

Short bio

Eran is a psychiatrist with over 13 years-experience in the pharmaceutical industry in senior global managerial positions, experienced in Lifecycle Management of pharmaceuticals from concept through all development phases and in strategic planning and execution of both clinical and commercial global operations. Eran did his residency in psychiatry at Sheba (Tel Hashomer) Medical Center in Israel where he later served as a Senior Psychiatrist. In 2005 he moved to the pharmaceutical industry where he served in various leadership positions including Country Medical Director for Lundbeck in Israel, Country Medical Director for Pfizer in Israel, Senior Director for Neuroscience & Primary Care Portfolio Development (Emerging Markets and Established Products Business Unit) in Pfizer Headquarters in New York and later as Senior VP Clinical Strategy at Alcobra Pharma. Eran serves today as the Clinical Lead in Teva's Global R&D, Neuropsychiatry.

As part of his global leadership roles Eran was involved in evaluating, developing and implementing digital and technological tools to support drug development in the field of Neuroscience (including Alzheimer's Disease, Depression, PTSD, Schizophrenia, OCD, Anxiety Disorders, Substance Abuse and pain).
