

Short Bio

David Ben Shimol, MD

Health Technologies Lead, Research

David Ben Shimol coordinates healthcare efforts at Google Research focusing on medical products and applied data analysis. David started his Alphabet career at Google X, in the team that graduated to become Verily, where he led product design, focusing on remote health monitoring, collaborations and application of ML to physiological signals. Prior to Alphabet, he designed medical algorithms for MediGuide, later part of St.Jude Medical.

Technion Graduate as a physician and engineer and Harvard Business School, David combines medical knowledge and a wide range of technical skills to launch, promote and manage medtech initiatives across multiple disciplinaries. In addition, David enjoys flying as recreational pilot and is father to baby Gaia and husband of Tom-Elena.
