

SHORT BIO

DR. ERAN SCHENKER
CHIEF MEDICAL INNOVATION OFFICER
NEUROLIEF

Dr. Eran Schenker is an executive leader with 20+ years of achievements, as an entrepreneur, global medical director, chief medical innovation technology officer and business development for biotechnology & pharmaceutical companies. Taking medical innovation from ideation to execution, achieving \$100M value deals, and phase I to IV clinical studies through FDA/EMA/TGA approvals, including marketing and distribution in 40 countries. Built pharmaceutical partnerships and facilitated transactions and co-development with Teva, Takeda, and Shire. Collaborated with C-level R&D, regulatory, and marketing executives, in multinational public and private companies in bio-cyber and e-health, such as Motorola, Nokia, Sun Microsystem, Elbit, and Pfizer. As biomedical space research specialist served as primary investigator for six international medical space projects, conducted on five NASA Space Shuttle missions.
